## SMOOTH IRON / FORGED IRON

Smooth Iron is hand machined from solid steel with a waxed surface.

Forged Iron is hand-forged from solid steel using Old World forging techniques. All rods are individually forged by hand, giving each a character and quality unique to the hands of the respective blacksmith.

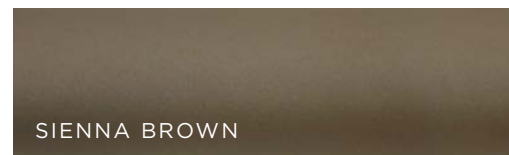

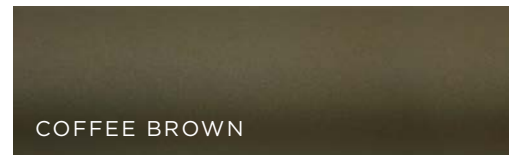

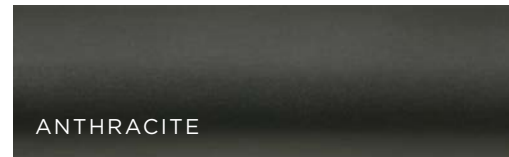

Forged Iron and Smooth Iron drapery hardware are standard with a brushed and waxed iron surface. Both are also available in the following artisanal hand-applied finish options: **Bronze, Copper, Gold, Olive Bronze, Silver, Edelrost, and Schwarz Gilt Patinas.** Brass and nickel finials available in polished or matte finishes.

## STAINLESS STEEL

Stainless Steel is constructed of machined stainless steel and is standard with a brushed finish. Also available in the following finish options: **Polished, Anthracite, Coffee Brown, Satin, Sienna Brown, Pinot, Absinth, Chablis** or custom colors finished to match any Pantone color.

Email [scott@fritschdraperyhardware.com](mailto:scott@fritschdraperyhardware.com) or call 626.298.3500 for details and pricing.

## CUSTOMIZATION

Fritsch's handcraftsmanship allows for the customization of any piece with few exceptions. Specialized curved bay window rods, any variety of custom back plates and rod diameters, even custom painted stainless steel in any Pantone® color—the possibilities are nearly limitless. A quote and a scale drawing for your approval will be provided for custom requests.
